AIRIN SAMPLE REPORT

Custom Platform Audit

Rating changes

What moved, and why it matters.

Risk by category

Training, sharing, retention, ownership.

Verbatim proof

Every claim points back to source text.

This AIRIN sample report is generated from verified demo platforms so you can see the paid-report direction before buying. Informational only, not legal advice.

The quarter's defining signal

The market is moving toward clearer training controls, but the broadest clauses still live in vendor development, improvement, and data-sharing language.

The useful report does not just say “risky.” It names the policy surface, shows the clause, explains the rating, and keeps the proof attached.

How AIRIN proves a report

1

Verbatim capture

Policy text is captured from source documents and stored with exact quotations.

2

Cryptographic hashing

Snapshots keep a SHA-256 trail so the evidence can be re-opened later.

3

Deterministic rubric

The same clause should produce the same risk rating every time.

4

Silence is caution

If a vendor does not clearly protect a right, the report says so plainly.

5

Dual-lens review

Creator, GRC, and counsel views are separated so one audience does not flatten another.

What the complete paid report includes

1. 30-40 page visual PDF report
2. Quarterly rating changes and why they moved
3. All HIGH-rated platforms analyzed
4. Five biggest policy changes with verbatim quotes
5. Industry trend analysis
6. Platform rankings by category
7. Legal, procurement, and board-deck-ready excerpts
8. Proof footer with citations and methodology
